Joint-stock company "Biohim" leads its own kind from Anisyevsky No. 21 distillery, founded in 1877.

In the second half of the last century, a radical reconstruction of the plant was carried out. Along with ethanol, the production of carbon dioxide, then baking yeast, was started, for which the transition to the processing of mainly sugar-containing raw materials (molasses) was carried out.

Constantly reconstructing, introducing new technology and technology, the Rasskazovsky biochemical plant until the mid-80s of the 20th century ensured the continuous growth of quantitative and qualitative indicators.

The nineties for the work collective proved to be extremely difficult, but having overcome difficulties, OJSC "Biokhim" is currently one of the few stable operating enterprises in the region, in which the controlling stake belongs to the state.

Today the capacities of the plant are:

1. Ethyl alcohol from food raw materials (conditional) - 748.0 thousand decal per year
2. Denatured alcohol from food raw materials - 712.6 thousand decal per year
3. Yeast bakery - 1740,0 tons per year.
4. Carbon dioxide -545.0 tons per year
5. The head fraction of ethyl alcohol - 22 thousand dal. in year

Every month OJSC "Biokhim" produces products with a volume of about 37 million rubles. The number of employees is 151 people.

JSC "Company" Faraday "successfully works on the shoe market of Russia for 18 years and specializes in the production of footwear for the power structures of the Russian Federation.

The factories of the company "Faraday" in the city of Kimry in the Tver region and in the town of Rasskazovo in the Tambov region employ more than 1000

people. Production facilities of the two enterprises allow producing up to three million pairs of shoes per year.

Customers of Faraday products are the Ministry of Defense, the Ministry of Internal Affairs, the Federal Security Service, the Ministry of the Russian Federation for Civil Defense, Emergencies and Elimination of Consequences of Natural Disasters, the Federal Security Service, Roskosmos and others.

Products of JSC "Company" Faraday "was awarded many gold medals and diplomas in the nomination" Unique domestic product of the rear of the Armed

Forces of the Russian Federation ", it was noted at many industry exhibitions.

The company "Faraday" develops and serially produces the full range of models of uniform footwear - for the rank and file officers, field and everyday, summer and winter.

Special footwear brand "Faraday" is designed for military personnel, security and security personnel. Footwear of ZAO "Company" Faraday "is produced by a unique technology with the use of the newest innovative materials, which by their technical characteristics provide a toe in different climatic conditions. Footwear protects the foot, shin and ankle joint from damage, from the action of aggressive media, from the effects of

flame.

Some unique materials and technologies, such as, for example, the GORE-TEX® membrane, are used in Russia only in the shoes of the company "Faraday". The company constantly develops new and improves existing models of footwear. The weight of shoes decreases, its performance characteristics are increased.

The result of this work was the creation of a new line of footwear for the power structures of Russia.

On the order of the Department of the Ministry of Emergency Situations, the rubber and leather footwear of the firefighter was developed. A unique production

line for the creation of a two-component special rubber footwear has no analogues in Europe, such footwear was created taking into account all possible requirements for use in production conditions, fire fighting, oil production and other special activities associated with increased danger. Such footwear has durability and heat resistance, it is protected from acids and alkalis, oil and oil products.

The release of quality products is possible only on modern equipment. The requirements set by the Ministry of Defense for footwear for servicemen are so high that without the constant improvement of the technical base, the search for new materials and the introduction of modern technologies, the task of providing the army and navy with convenient and practical footwear is simply not solved. The company "FARADEI" annually carries out technical re-equipment of the production capacities of the enterprise, training of employees, which allows to cope with the increased number of tasks, ensures consistently high quality of products.

The enterprises of "Faraday" are equipped with the latest computerized equipment for the production of carousel type shoes by the direct tide method of DESMA (Germany). Special software allows you to produce footwear molding method of fastening on a combined sole made of high-strength thermopolyurethane and polyurethane.

High-tech equipment for the production of footwear using membrane materials, equipment for automatic cutting of ATOM materials, machines for tightening the top of the shoe onto the shoe with software, a large park of sewing equipment of the firm DURKOPP-ADLER with software control for sewing leathers increased thicknesses

Multistage quality control at all stages of production, testing of applied materials in the newest in-house laboratory, as well as in the laboratory of the Central Research Institute of the leather and footwear industry allow the Company to produce high-quality products. Quality control at the enterprise is confirmed by the European quality management

certificate GOST R ISO 9001-2001.

The ideal "test range" for testing new footwear samples is the planned military exercises. After each exercise, the company's management meets with the personnel and the command of the units that took part in the exercises. All the remarks and proposals of the military personnel in the company are carefully studied, the most rational of them are used in the subsequent work on the collection of shoes.

Annually in the territory of the training centers of the subdivisions of the Ministry of Defense, the Ministry of Internal Affairs and other law enforcement agencies of CJSC "Company" Faraday "together with military personnel conducts field tests of new samples of footwear for special units. Shoes are tested for durability and suitability for operation in the context of performing combat missions in any climatic and weather conditions

The company "Faraday" has many years of unique experience. Together with TsNIIKP and CJSC INII in the field of development and production of special and military footwear, as well as with the logistics support departments, ZAO FARADEY Company developed new footwear lines for all power structures of Russia, which is clearly illustrated by the expansion our innovative

JSC "Remattra" is engaged in capital repair of domestic and imported machinery, manufacture of individual units and units, as well as the production of timber trucks, litter carriers, pipe carriers, car bodies, residential units, centralizers for welding pipes from 51 to 1420 mm in diameter.

The enterprise can re-equip transport (KAMAZ, URAL, KrAZ) for pipelines, timber carriers, lapwing trucks.

Performs repairs: KOMATSU: D355S, D355A, D455A, D155, RS 400, Caterpillar: D9L, CAT-330, KATO, MAZ, KAMAZ, KRAZ, ZIL, T-130, T-170, Kirovets 701, IKARUS, CLAAS, LIBHERR . It produces spare parts for: KOMATSU: D355C, D355A (lining, radiators in assembly, radiator cores, RVD (imported hoses are used for production), cabins for pipelayers, protection, pipelines, fuel tanks).

The organization has a railway access impasse (South-Eastern Railway), through which it is possible to send and receive goods, thereby achieving the optimal transport scheme for the delivery of products.

LLC "Production Company" Rascom" is a young tannery, but its roots go back to the beginning of the last century, when the craftsmen worked in Rasskazovo, eventually merged into artels, then formed a commercial cooperative, in 1960 a tannery was established on its basis The plant was established in 1985 under the name of Rasskazovo - Invest JV, when the production of tanning goods was started

on a new production complex built by Yugoslav specialists on a turn-key basis. eat and reconstruction took place in the following years. In late 2001, the legal successor of the joint venture "Rasskazovo-Invest" was tannery LLC PF "Rascom".

Rasskazovo's tannery is one of the leading producers of natural leather in Russia. The annual production capacity is 180 million sq. m. dm. tanning goods per year. It has experience in the foreign market since 1989. It is a member of the Union of tanners and shoemakers.

The company specializes in the purchase, dressing and finishing of hides of cattle, small cattle, pigs and horses. The skin may be facial and polished, coated and without it, painted and natural, of varying thickness and configuration. Ready-made leathers have a very wide range of applications. This is the leather for the shoe and lining, for clothing and haberdashery leather.

In February 2012, the company

launched a new production line for the production of leather with polyurethane coating technology "Levokast." "Levokast" is a technology of applying a special chemical composition for hides, which allows to hide the natural defects and damages on the skin, to improve its quality indicators. The enterprise was the first to master this unique technology for Russia, set up production and began to produce leathers with polyurethane coating. Until now, such products have been produced only in four countries.

The joint-stock company "Nekrasovskoye Repair and Technical Enterprise" is the legal successor of the same name RTE of the "GOSKOMSELHOZTEHNIKA" system.

This name it received from its location - in the vicinity of three side streets, Nekrasovsky in the area of Nekrasovskaya Street.

As an independent unit of the RTE was allocated from Rasskazovskaya "Raiselkhztechnika" in 1978 in connection with the completion of construction and commissioning of a complex for the repair of full-size tractors "Kirovets".

From this moment until the present day, it exists as a specialized enterprise for the repair of Kirovets tractors and its units and assemblies.

Later on, the RTE "Nekrasovskoye" included other "Raiselkhoztehniki" workshops for repair of hydraulic system units and assemblies, diesel fuel equipment,

starting engines and their regulators.

As a part of the objects there is a boiler house on gas fuel, a reserve power source - a diesel generator with a capacity of 1000 hp, its water intake.

At the enterprise there are all necessary capacities for conducting repair works and restoration of details. As part of the RTE on the territory of the company operates an exchange office, where the exchange fund is concentrated almost all the repair nomenclature.

Today it is Closed Joint-Stock Company of workers "Nekrasovskoye Repair and Technical Enterprise" with a workforce of about 140 people.

The ElectroServer plant was founded in 1999. The legal name of LLC "SERVER". The plant produces rectifiers and switchboard equipment.

The production base has workshops: instrumental, stamping, powder coating, billet and assembly. In addition, there is a section of non-standard equipment, machining and heat treatment.

The workshops are equipped with equipment that uses advanced technologies to improve the quality of

products.

The company has developed and introduced modern technologies that provide a high degree of automation and mechanization of production.

Financial resources (city budget)

In 2016, the city's budget received revenues of 726 million rubles, which is more than last year's income by 110.3 million rubles, or 17.9%.

activities on adaptive physical culture, the participation of the local teams in regional competitions.

In the reporting period about 30 town competitions were organized and conducted with both students and adults in various sports: football, basketball, skiing, chess, gymnastics, shooting, wrestling (judo, sambo and Greco - Roman), military applied all-around, competitions of young footballers for the prizes of the club "Leather Ball" in three age groups, sports festivals dedicated to the Town Day, Youth Day, Sportsmen's Day, sporting events within the Olympic Day, the day of winter sports, timed to the third anniversary of the XXII Olympic Games in Sochi and the 72nd anniversary of the Victory in the Great Patriotic War, the All-Russian Health Day, as well as the decades and festivals of the national fitness programme «Prepared for Work and Defence» among schoolchildren, kindergarten children and adults, the municipal stage of presidential games and presidential contests.

In the town competitions of regional scale in skiing, mini-football among school students devoted to the Day of Defenders of the Fatherland, regional competitions in soccer in offset of the Sports Day - 2017, the championship and the Cup of area on football among men's and youth teams, Greco-Roman wrestling, judo, skiing, basketball, boxing and others were held.

Among the town events devoted to significant dates, there should be noted the winter football championship dedicated to the anniversary of the withdrawal of troops from Afghanistan, the competition in the All-Russia mass ski race "Russian Ski Track 2017", military-applied all-around among pre-conscription youth, dedicated to the Day of Defenders of the Fatherland, Victory Day, athletics relay race through the streets of the town, dedicated to the Victory Day.

The best sportsmen of the town performed at regional competitions in Tambov, Kotovsk, Uvarovo, Kirsanov, Michurinsk as well as in republican boxing competitions (Tambov, Lipetsk, Voronezh, Yaroslavl, Yelets), in basketball competitions (Ryazan, Voronezh), in kickboxing competitions (Lipetsk), in Greco-Roman wrestling competitions (Tambov, Ryazan, Mikhailovo, Voronezh), in skiing competitions (Voronezh).

Active information work was carried out. The sports events of the town and participation in regional and national competitions were reported in the newspaper «Trudovaya nov», on the local television, on the sites of the town administration and the party «United Russia».

A lot of work to improve the health of the population was conducted by the municipal budgetary institution of Sports and recreation "Tekstilshchik". Currently, this sports facility is being overhauled.

Paid groups of athletic gymnastics, aerobics and fitness as well as judo and sambo clubs are organized in the gym located on 60 let Rasskazovo street.

In the upbringing of the younger generation the Children's and Youth Sports School, the House of Children's Creativity actively participate. The work is carried out in close cooperation with the Department of education, the School of Arts, the Station of Technical Creativity, the town council of Voluntary Society for Assisting Army, Air Force and Navy, the Commission for minors and the protection of their rights in the town administration.

The following activities were carried out within the "Tourism Development" subprogramme:

hiking routes were designed, excursions around the town are held by bus and on foot. During the bus route "From the history of Rasskazovo" tourists are introduced to the natural historical and cultural heritage of the town. Hiking routes "Monuments of military glory" and "Rasskazovo merchant" are very popular among schoolchildren of the town;

as a part of the development of the tourist industry of the town shopping tours are developed and implemented. Information about the most popular knitwear enterprises of the town is available on the website of the town administration in the section "Tourism".

Visiting our town you can also go on excursion to the mini-museum of the sock which is located in the Central Library of the town.

In order to develop tourism such town mass events were held as the festival of wide Shrovetide, the fair of craftsmen, where you could buy knitted products, wood products, textiles and birch bark, had a look at souvenirs from Rasskazovo, Kirsanov, Suzdal dedicated to the Town Day.

Local producers and masters took part in the international, all-Russian and interregional actions on tourism i.e. the all-Russian competition festival (Lipetsk, Voronezh), regional weekend fair (Moscow, Cheboksary, Tambov) to spread the image of our town and promote the local brands.

INFRASTRUCTURE OF THE TOWN'S ECONOMY

	Name of organizations, institutions	Number
1.	Total number of general education institutions	4
	Among them: - schools	2
	- Lyceum	0
	- boarding schools	1
	- Orphanage	1
2.	Number of pre-school educational institutions	9
3.	Number of mass libraries and their branches	3
4.	Number of institutions of culture and art	10
	Including:	
	- club institutions	1
	- music schools	1
5.	Athletic facilities	172
	Including:	
	- Sport halls	22
	- swimming pools	2
6.	Objects of the consumer market	471
	Among them: - shops, pavilions	338
	- public catering establishments	42
	- enterprises of the sphere of household services	80
	Enterprises of wholesale trade	10
	Market for 1470 places	1
7.	Number of branches, pre-offices of banks	7
	Number of post offices	

In the sphere of communication services in the town, there is one fixed-line monopolist of OJSC «CenterTelecom-TambovElectrosvyaz» and several large mobile communication operators (MTS, Beeline, Megafon, etc.).

INVESTMENT PROJECTS 2014-2020

1. Bioethanol production at OJSC "Biochem"

At the end of 2013, OJSC “Biochem” was given the status of an experimental (pilot) plant for carrying out research and development work under the BIOENERGETICS program as envisaged in the Action Plan ("road map") for "Development of Biotechnology and Genetic Engineering".

At the legislative level, the program "Bioenergetics" provides for making changes in the technical regulations and technical conditions for the production of gasoline 5% bioethanol. Today the capacities of all distilleries in Russia are not able to meet the demand for this raw material. This is about the creation of a new industry that will, in addition to solving environmental problems (exhaust fumes), encourage the development of agriculture and the processing of its products.

Fuel surcharge (production of Russian biofuel: largest investors and sites)

1. Taleon Industries
 Plant name: STOD
 Location: Tver region, Torzhok
 Capacity: 60 thousand t. per year
 Year of launch: 2007
2. Bank "Saint-Petersburg"
 Plant name: “Vologdabioexport”
 Location: Vologda Region, Great Ustyug
 Capacity: 48 thousand t. per year
 Year of launch: 2006
3. Ltd “Biotop”
 Plant name: “Biotop”
 Location: Novgorod region, Valdai
 Capacity: 25 thousand t. per year
 Year of launch: 2004
4. “Peno”
 Plant name: “Peno”
 Location: Tver region, Peno
 Capacity: 25 thousand t. per year
5. Ltd “Green power”
 Plant name: “Green power”
 Location: Leningrad region, Gatchina district, Voiskovizy village
 Capacity: 24 thousand t. per year
6. Ltd “Woodworking company "Yenisei"”
 Plant name: “Woodworking company "Yenisei"”
 Location: Krasnoyarsk Territory, Berezovka village

- Capacity: 24 thousand t. per year
Year of launch: 2006
7. CJSC “Rospolitehles”
Plant name: “Rospolitehles”
Location: Saint – Petersburg
Capacity: 24 thousand t. per year
Year of launch: 2005
8. Ltd “Salotti”
Plant name: “Salotti”
Location: Leningrad region, Velikie Luki
Capacity: 24 thousand t. per year
Year of launch: 2004
9. Ltd “Ecopel”
Plant name: “Ecopel”
Location: Leningrad region, Kirovsk
Capacity: 24 thousand t. per year
Year of launch: 2005
10. PE “Kruglov”
Plant name: “Kruglov”
Location: Nizhny Novgorod
Capacity: 14 thousand t. per year
11. Ltd “Murashinsky biofuel plant”
Plant name: Murashinsky biofuel plant
Location: Kirov region, Murashi
Capacity: 14 thousand t. per year
Year of launch: 2006
12. Ltd “Reley”
Plant name: “Reley”
Location: Kostroma region, Buoy
Capacity: 14 thousand t. per year
Year of launch: 2004
13. Ltd “EMC-Dnepr”
Plant name: “EMC-Dnepr”
Location: Smolensk region
Capacity: 14 thousand t. per year
Year of launch: 2002
14. JSC Algir Pellets
Plant name: Algir Pellets
Location: Komi republic, Priluzsky district
Capacity: 14 thousand t. per year
15. CG “Vipoil”
Plant name: “Volga – ethanol”
Location: the Volgograd region, Surovikinsky district
Capacity: 300 thousand t. per year
16. SPC “Ecology”
Plant name: “Bioethanol – Tambov”
Location: Tambov
Capacity: 250 thousand t. per year

17. CG "Konti"
Plant name: -
Location: Ivanovo region
Capacity: 200 thousand t. per year
18. CG "Pava"
Plant name: -
Location: Altai Territory, Rebrikhinsky District
Capacity: 200 thousand t. per year
19. SPC "Ecology"
Plant name: "Bioenergy"
Location: Stavropol
Capacity: 200 thousand t. per year
20. CG "Titanium"
Plant name: -
Location: Omsk
Capacity: 100 thousand t. per year
21. Ltd "Miranda"
Plant name: "Miranda"
Location: Vladikavkaz
Capacity: 73 thousand t. per year
Year of launch: 2007
22. CG "Titanium"
Plant name: "Biochem"
Location: Kazakhstan, Taiynsha
Capacity: 57 thousand t. per year
Year of launch: 2006

The plant was visited by the representative of the Federal Service for Alcohol Market Regulation. He was convinced of the ability of the "Biochem" plant to produce bioethanol. In the near future an order will be received for the production of an experimental instance.

After changes in the legislation on excise duties for the production of alcohol (July 2014), the plant will switch entirely to the production of bioethanol. The plant's capacities will be loaded by more than 100%, the plant will work on a rolling schedule.

Today Europe is experiencing a deficit of areas for obtaining the required raw materials; this means that in the coming years, the demand for bioethanol will only increase, the more so that the European Union plans to replace the traditional fuel with the another one from the reproduced raw materials at least 20 % by 2020 and the main role is assigned to bioethanol.

This is a unique chance for JSC "Biochem". "Biochem" is the most prepared distillery among all active ones in Russia to be an experimental base for solutions and development of scientific and practical issues of the production and use of bioethanol. This promises both the plant and the city a completely new perspective - a technological and economic breakthrough.

2. Waste recycling new technologies using vermicultures at OJSC “Biochem”.

The company has developed a new plan for recycling bards using vermiculture. New vermibiofilters will allow the bard to be disposed of and create biohumus.

3. Bard tests as an organic fertilizer in the sowing fields at OJSC Biokhim.

Long-term studies conducted by the federal state educational institution of higher professional education The Ivanovo State Agricultural Academy by Academician AK Belyaev, the Vladimir Agricultural Research Institute show that the alcohol industry waste is successfully used as an organomene fertilizer on different types of soils.

Bard, as well as mixtures based on it, can be added for rye, barley, potatoes, perennial grasses, etc. In 2015, OJSC "Biochem" together with the State Educational Institute of the Higher Professional Education of the Michurin State Agrarian University will conduct the introducing bard tests in the production fields as an organic mineral fertilizer.

The purpose of the experience will be the development and justification of the main elements of the technology of using bard as a liquid organic fertilizer for agricultural crops and fodder land.

Experiment objectives:

- reveal the influence of introducing bards various norms on the agrochemical properties of the soil, on growth and development.
- study the change in the acidity of the soil.

In accordance with the Program of the Government of the Russian Federation, import substitution in the agro-industrial complex, the OJSC "Biochem" management signed a contract with French firms in 2016 for joint work on the organic fertilizer production - bard, as well as the modernization of production and the introduction of energy-saving technologies. Organic fertilizers experiments are conducted jointly with the specialists of the Michurinsky State Agrarian University.

4. Ltd “Faraday” innovative development .

Faraday Company entered the Rasskazovo city industrial complex since 2008, specializes in the production of military, working, and special footwear for outdoor activities.

In the summer 2013, successful shoes tests were conducted during a high-latitude Arctic expedition at the drifting research station "North Pole-40" of Federal Service of Russia for Hydrometeorology

and Environmental Monitoring. Positive feedback was received on the model for a particularly cold climate.

In addition, Faraday is a shoe supplier for the annual Victory Parade on Red Square in Moscow. The company has done a great job of sewing shoes for the staff of the 2014 Olympic Games in Sochi.

"FARADEY" customers are the power structures of Russia: the Ministry of Defense, the Ministry of Internal Affairs, the Federal Security Service, the Federal Guard Service, the Ministry of Emergency Situations. In October 2013 the company "Faraday" held a round table devoted to the problems and prospects of enterprises of the defense industry complex of Russia. During the meeting the following issues were discussed:

innovative developments of the State Defense Order, which should be conducted by producers with significant experience and own production capacities;

the stimulation of innovation and the development of production by tightening the criteria and regulations for selecting the executor of the defense order;

the requirements for executors of the State Defense Order, who must have their own qualified personnel and undergo an annual technical audit;

the need for an independent system of quality control of clothing items, supplied by the defense order.

In the near future at the production sites of CJSC "Faraday Company", many innovative ideas will be realized. The company promises the production of "smart shoes", which at the level of heat exchange processes is adjusted to the foot of a person, without requiring lacing or fastening.

5. Housing construction.

Individual housing construction will be developed in the prepared land plots of the micro district Fruit-Dwelling (96 hectares, 37 hectares), new residential areas will be built here. In 2016-2018, it is planned to complete the construction of multi-apartment buildings.

6. Construction of new roads and communal infrastructure objects.

7. The embankment construction.

The initial preparatory stage for the embankment construction has already been carried out, a project has been developed and technical documentation has been prepared. Work started with the river clearing.

Further there will be the river embankment on both sides. There will be several pedestrian bridges, bicycles and running tracks, recreation places on the embankment. The territory will be planted with perennial plantations.

8. The city recreation park improvement.

9. Construction of a new comprehensive school with 900 study places.
